New Lithium Battery Brands Listing Procedures

- ▶ Afore provides CAN / RS485 BMS communication protocol on the basis of specific conditions.
- ▶ Based on the BMS communication protocol provided by Afore, the battery supplier is required to test compatibility with Afore inverters firstly.
- ▶ Afore will conduct and verify the compatibility test with the new battery before New Battery Brands Listing. The battery list is subject to changes and updates will be published from time to time. Any unauthorized battery connections made without prior authorization from Afore will not be covered by Afore limited warranty.
- ▶ Please contact Afore for technical support on the new batteries not on the approved list to verify if any compatibility test is required.

(Technical support: info@aforeenergy.com)

Other Terms Should be Noticed

- ▶ Users are reminded that although Afore hybrid inverters are technically compatible and capable of achieving good results with lead-acid batteries, Lithium-ion batteries with direct communication to the charging device are the preferred battery choice. Use of lead-acid or other similar batteries requires experienced and precise design, installation and maintenance to keep the battery working functionally. Failing to do may lead to battery failure, compatibility issue or other damages to the solar system. Users should first contact Afore for technical consultation and obtain official confirmation prior to installing any battery not included in the official published compatibility list, including but not limited to lead-acid battery.
- ▶ Unless there is a specific agreement between Afore and the battery manufacturer, for all battery packs NOT listed herein but have completed the compatibility test with Afore inverters, the installer/system integrator shall be responsible for battery safety, as well as system performance and reliability. Afore shall guarantee proper inverter performance under normal working conditions within the standard warranty term and provide limited technical support if applicable. However, Afore shall assume no liability on any system malfunction or any incurred loss or damages whatsoever.
- ▶ Failing to follow the instructions above or failing to provide correct battery information will render Afore's warranty null and void. Afore shall not be liable for any consequences arising therefrom. Afore reserves the right of final interpretation.
